

Paul-Andrei Onac

Frontend Developer

About Me

I am an entirely committed and passionate Frontend Developer with a solid foundation in knowledge of web applications and websites. With over three years of experience, I embrace my work with dedication and understanding for users' needs.

Being surrounded by technology for as long as I could remember, I took my first steps in web development with curiosity and eagerness to learn. My approach involves staying up-to-date with the emerging trends, frameworks and best practices, which allows me to design web projects that are both optimized for high performance and visually engaging.

Besides my technical skills, I am a candid, diligent and self-taught person, who thrives when working in a team based on collaboration and union. I believe the best solutions come from people who share similar visions and work together as a cross-functional team.

Work Experience

Mar 2022 – Present
WELINK SRL | Bucharest

Frontend Developer

- Enhanced user experience using JavaScript and accomplish webpage objectives by creating site structure with HTML5 Boilerplates, navigation, animations, page optimization, and graphics integration using OOCSS and SASS in accordance with Web Standards W3C;
